

Local - Timber Truss offers free shipping to all customers within a 100 mile radius of Salem, Virginia and further on a case by case basis. We also provide free shipping to the immediate areas surrounding our satellite offices depending on the size order we receive. We reserve the right to add delivery charges on small orders that do not complete a trucks load capacity.

East Coast U.S. - Because of the differences in load sizes and truss configurations, there may be difficulty in shipping long distances for some of our truss components. Depending on what TrussMark Home you are interested in and where the home would be built, we would have to determine if it would be possible to ship the package to you as presently designed. We can often redesign the structural systems to allow for longer distance shipping. Customer is responsible for ALL shipping costs by common carrier or an additional charge may be assessed if delivered by our own fleet of trucks.

International - Please contact us to discuss exports. The customer may want to provide the shipping or we may handle the logistics or delivery at Timber Truss.
